

90-Day DSA Roadmap (Detailed + Interview Focused)

Daily Routine:

- 2–3 hours coding
- Solve 2–4 problems
- Revise old problems
- Maintain notebook for patterns

Phase 1 (Day 1–15): Arrays & Strings

Topics: Array basics, Prefix Sum, Sliding Window, Two Pointers, Strings

Practice Problems:

- Two Sum
- Maximum Subarray (Kadane)
- Longest Substring Without Repeating Characters
- Move Zeroes
- Stock Buy/Sell

Phase 2 (Day 16–25): Sorting & Binary Search

Topics: Merge Sort, Quick Sort, Binary Search, Binary Search on Answer

Practice Problems:

- Binary Search
- Search in Rotated Array
- Peak Element
- Aggressive Cows

Phase 3 (Day 26–35): Linked List + Stack + Queue

Topics: Linked List operations, Stack, Queue, Monotonic Stack

Practice Problems:

- Reverse Linked List
- Detect Cycle
- Valid Parentheses
- Next Greater Element

Phase 4 (Day 36–50): Trees

Topics: Binary Tree, BST, Traversals, Height, Diameter, LCA

Practice Problems:

- Level Order Traversal
- Diameter of Tree
- Lowest Common Ancestor

Phase 5 (Day 51–60): Heap & Hashing

Topics: Priority Queue, HashMap, HashSet

Practice Problems:

- Kth Largest Element
- Top K Frequent Elements

Phase 6 (Day 61–75): Graphs

Topics: BFS, DFS, Topological Sort, Dijkstra

Practice Problems:

- Number of Islands
- Course Schedule
- Shortest Path

Phase 7 (Day 76–90): Dynamic Programming & Backtracking

Topics: Memoization, Tabulation, Knapsack, LCS, Backtracking

Practice Problems:

- Climbing Stairs
- 0/1 Knapsack
- LCS
- N-Queens

Weekly Strategy:

- Revise all problems weekly
- Re-solve at least 5 old problems
- Focus on weak areas

Interview Tips:

- Focus on patterns, not memorization
- Practice explaining your solution
- Write clean and optimized code

- Time & space complexity matters
